cross sectional anatomy by CT and intro to CT procedures

In geometry and science, a cross section is the non-empty intersection of a solid body in three-dimensional space with a plane, or the analog in higher-dimensional spaces. Cutting an object into slices creates many parallel cross sections. The boundary of a cross section in three-dimensional space that is parallel to two of the axes, that is, parallel to the plane determined by these axes, is a ...

Typical anatomy " in its most common disposition, both vertebral arteries arise as the first branches of the subclavian artery, and after a short soft tissue course enter the C6 neural foramen. They then ascend to C2, make a wide loop between C2 and C1 (thereby allowing for the curious to turn their necks every which way, and for some of us to dissect our vert in the same location, " as ...
