

decision making in medicine pdf

Shared decision-making in medicine (SDM) is a process in which both the patient and physician contribute to the medical decision-making process. Health care providers explain treatments and alternatives to patients and help them choose the treatment option that best aligns with their preferences as well as their unique cultural and personal beliefs.

Shared decision-making in medicine - Wikipedia

In psychology, decision-making (also spelled decision making and decisionmaking) is regarded as the cognitive process resulting in the selection of a belief or a course of action among several alternative possibilities. Every decision-making process produces a final choice, which may or may not prompt action.. Decision-making is the process of identifying and choosing alternatives based on the ...
