Isogeometric analysis: CAD, finite elements, NURBS, exact

Euclidean geometry is a mathematical system attributed to Alexandrian Greek mathematician Euclid, which he described in his textbook on geometry: the Elements. Euclid's method consists in assuming a small set of intuitively appealing axioms, and deducing many other propositions from these. Although many of Euclid's results had been stated by earlier mathematicians, Euclid was the first to show ...

Euclidean geometry - Wikipedia

Euclid (/ ˈjuːˌkliːd /; Ancient Greek: Ἐυκλείδης; pronounced [eu̯ˌkliːˈdɛ̂ːs]; fl. 300 BC), sometimes given the name Euclid of Alexandria to distinguish him from Euclides of Megara, was a Greek mathematician, often referred to as the "founder of geometry" or the "father of geometry". He was active in Alexandria during the reign of Ptolemy I (323–283 BC).

GEOMETRY OF NUMBERS WITH APPLICATIONS TO

Roughly 2400 years ago, Euclid of Alexandria wrote Elements which served as the world's geometry textbook until recently. Studied by Abraham Lincoln in order to sharpen his mind and truly appreciate mathematical deduction, it is still the basis of what we consider a first year course in geometry.

Reliable structures, very precise drawings. CYPECAD was brought about to carry out the analysis and design of reinforced concrete and steel structures, subject to horizontal and vertical forces, for houses, buildings and civil work projects.. Its use guarantees maximum analysis reliability and the best drawing design, including the following elements:

CYPECAD. Analysis and design of reinforced concrete and

Projective Geometry: A Short Introduction - Inria

As groupoids generalize groups, motivated by group extension we propose a concept of groupoid extension for Lie groupoids, i.e., $[\text{sf } 1 \text{ to } A \text{ to } G \text{ to } K \text{ to } 1]$ where $\text{sf } A, G$ and $\text{sf } K$ are Lie groupoids.
